

Two Customers Revisited

BCL Magnetics, Ltd. Installs Second Minster *Hummingbird*[®] Ultra-High Speed Press System to handle new business generated by the first one.

Second HB-60 Minster Hummingbird Automated Stamping System at BCL Magnetics.

The first lamination specialists to run a Minster Hummingbird press, BCL Magnetics Ltd., Burlington, Ontario, has decided their decision to "start with the top-notch press in the industry" has paid off. The high-productivity and exceptionally good part quality they attained in making long, efficient high speed runs has boosted their business volume. As orders from customers increased they bought their second Hummingbird system which was recently installed.

Both lines include a Hummingbird 60 ton press with noise enclosure, a Minster high speed Cam Feed and Minster Coiled Material Handling System consisting of coil reel, stock straightener and electronic loop control.

BCL Magnetics has run both Hummingbird systems at speeds to 1200 spm on high quality laminations for many applications.

The Hummingbirds have helped them become the fastest growing lamination-maker in Canada. Obviously this company's belief that only the best press equipment would fit their formula for success has been proven sound.

First Hummingbird system helped increase business volume.
