

Minster & Tinnerman combine experience to job-tailor B1 presses for higher speed and precision.

Tinnerman Products, Inc., Cleveland, Ohio, uses banks of Minster B1 presses to produce thousands of different SPEED NUT® brand fasteners. It's a high speed, high precision, high volume operation. The parts are small and intricate. The presses are run up to 800 spm with extreme precision.

Comprehensive press performance data and production records, maintained on each machine by Tinnerman, are used for equipment evaluation. MINSTER too, evaluates and studies these facts, Tinnerman's

experience and suggestions. Result: Advanced Developments in the B1 High Speed Gap Presses. This "JOINT EFFORT" has meant maximum press efficiency, greater parts accuracy and higher speed with precision, not only for Tinnerman Products, but for all Minster B1 press users.

Bulletin 39 contains complete information on B1 presses from 16 through 60 tons capacity. Write for it.

The Minster Machine Company, Minster, Ohio 45865.
