

Minster Presses at

help make fun
for the young...
and not so young

More than 3,000,000 heavy metal parts for sturdy Tonka toys are stamped every week by the line of Minster E2 and S2 automatic progressive die production presses at Tonka Corporation, Mound, Minn. These precision presses, ranging from 150 to 300 tons capacity, were "job-tailored" to help Tonka meet its high volume market production demands.

Why does Tonka consistently buy Minster presses? Mr. Charles M. Groschen, Executive Vice-President, credits the interest and ability of the Minster Press Productivity Team . . . factory sales and service people and the local representative.

In its own products, Tonka has found that quality breeds success. They apply the same thinking in buying presses. You'll be satisfied with Minster too. Call on us.

Fun-time with a Tonka Mighty-Dump truck and pedestal type Firebowl Barbecue.
